Hi Jason, thank you for your time on the phone just now. Please accept Council's sincerest apologies for the delay in giving you a definitive response to this enquiry.

Council's contractor has advised that they have no issue with the proposed 19% section of internal road within the development.

Further to this, as the contractor will need to proceed onto a private road to conduct services the applicant will need to complete a Consent Form authorising such access. Once the development is complete and they are within 4-6 weeks from occupancy of the premises they will also need to apply for a waste service, this consent form forms part of that application. Please note this is a separate process to the Development Approval.

To apply for waste bins, they simply need to go to Council's website at Order a commercial and/or shared waste service | City of Gold Coast and read through the information there. The simplest way is to look towards the bottom of the page and locate a box with three tabs on it, if they click on the Online option and then select the box named *"Apply for a Commercial Bin – For property Owner, Property Manager or Body Corporate"* they can complete the form there simply and quickly.

The consent form can be accessed on the same webpage via the link entitled Liability Waiver form just above the bin order form.

Your application will then be processed, the site inspected, and bookings made for bin delivery and commencement of servicing.

Thanks again

Sincerely,

James Stanfield
