

# ACity Plan code template

This code template supports the preparation of a development application against either the acceptable outcome(s) or performance outcome(s) contained in the code. Development assessment rules are outlined in **Section 5.3.3** of the City Plan.

**Please note:**

For assessment against the overall outcomes, refer to the appropriate code.

**Note:** The whole of the planning scheme is identified as the assessment benchmark for impact assessable development. This specifically includes assessment of impact assessable development against this strategic framework. The strategic framework may contain intentions and requirements that are additional to and not necessarily repeated in zone, overlay or other codes. In particular, the performance outcomes in zone codes address only a limited number of aspects, predominantly related to built form. Development that is impact assessable must also be assessed against the overall outcomes of the code as well as the strategic framework.

## 9.4.15 Works for infrastructure code

### 9.4.15.1 Application

This code applies to assessing operational work for development where indicated in **Part 5 Tables of assessment – Operational work**.

When using this code, reference should be made to **Section 5.3.2** and, where applicable, **Section 5.3.3**, in **Part 5**.

### 9.4.15.2 Purpose

- (1) The purpose of the Works for infrastructure code is to ensure that all works for infrastructure is designed and constructed with the City's best land development practices.
- (2) The purpose of the code will be achieved through the following overall outcomes:
  - (a) The design, construction, operation and maintenance of infrastructure is cost effective over its lifecycle, whilst providing an appropriate level of service;
  - (b) Environmental and property impacts are avoided along with the potential for stormwater and ground water to enter the city's wastewater system;
  - (c) The integrity of existing infrastructure is not compromised;
  - (d) Movement networks are designed and constructed to be functional, safe and achieve good connectivity; and
  - (e) A high standard of public health and safety is maintained.
