Details of the request

Please provide any relevant history of the application

The applicant has recently received approval of a new combined Stage 1 ROL and Operational Works – Change to Ground Level approval (Council Ref: ROL/2020/123). As part of this approval, an updated condition (refer below) relating to the sewer servicing strategy was included which reflects the outcomes of Gold Coast Water & Waste's wider change in strategy for the Stapylton catchment.

Trunk Development Infrastructure**4 General Sewer servicing arrangement**

Unless otherwise determined by Gold Cast Water, the sewer servicing arrangements shall be generally in accordance with the following:

- a Connect Stage 1 to Council's existing live 100mm diameter sewer rising main located within the southern verge of Stapylton Jacobs Well Road via an interim trunk sewer pump station to be contained within the Stage 1 road reserve and in accordance with Concept drawing no. 5941 ENG EXTSEW SK002 Rev B prepared by Gassman Development Perspectives dated 12-11-2020.
- b The balance of Stage 2 and Stage 3 shall gravitate into Council's future trunk wastewater network located on the Christensen Road frontage of the subject site.

Based on this revised sewer servicing strategy for the Stapylton catchment, the submitted engineering drawings have been updated to reflect the new interim trunk sewer pump station requirement with the Homestead Drive road reserve along with the augmentation of the existing 250mm diameter and 100mm diameter sewer rising mains along Stapylton Jacobs Well Road that were to be decommissioned as part of the previous 450mm diameter trunk gravity sewer main construction through to existing SPS BE35.
